

Top 25 Generative AI Interview Questions

1. What is Generative AI?
2. How do LLMs work?
3. Explain Tokens and Tokenization.
4. What are Embeddings?
5. Static vs Contextual Embeddings.
6. Explain the Transformer architecture.
7. What is Self-Attention?
8. Why are Positional Encodings needed?
9. What is Next Token Prediction?
10. Prompt Engineering techniques.
11. Zero-shot vs Few-shot prompting.
12. What is RAG?
13. Vector Database vs Traditional Database.
14. What are FAISS and ChromaDB?
15. What is Semantic Search?
16. Chunking strategies in RAG.
17. What is Hallucination? How to reduce it?
18. Fine-tuning vs Prompt Engineering.
19. LoRA and QLoRA.
20. Agentic AI vs RAG.
21. LangChain vs LangGraph.
22. Function Calling in LLMs.
23. Evaluation of LLM applications.
24. LLM deployment considerations.
25. Explain your RAG project end-to-end.
